AI 4 SOCIAL IMPACT

5-12/12/2025
TALLIN, ESTONIA

ABOUT THE PROJECT

Artificial Intelligence is reshaping our world, offering unprecedented tools to address complex societal issues—from healthcare and education to climate change and social inclusion. However, without conscious guidance, AI can also perpetuate biases and inequalities.

ÜHENDUSTE LIIT

MORE ABOUT IT...

This youth exchange is designed to empower young people to become ethical architects of the digital future. We will explore how AI can be harnessed as a force for good, creating innovative solutions to local and global challenges. Through non-formal education, hands-on workshops, and collaboration, participants will gain the skills and mindset to initiate positive, AI-driven social change in their communities.

The project will include a study visit to a leading Estonian e-governance or tech-for-good startup, providing real-world inspiration from one of the world's most digitally advanced nations.

THE OBJECTIVES

The objectives of this youth exchange are to empower youth to:

- **Discover & Understand:** Raise awareness of the potential and ethical implications of Artificial Intelligence for social impact.
- **Leap & Develop:** Develop digital competencies, critical thinking, and problem-solving skills through hands-on AI workshops, leaping into new learning experiences.
- **Create & Innovate:** Design and prototype your own AI-based solutions for a social or environmental challenge, reaching your creative peak.
- **Connect & Grow:** Foster intercultural dialogue, collaboration, and a lasting network of young European change-makers.

THE PARTICIPANTS:

This project is for young residents of Estonia, Lithuania, Germany and Poland. Each national group will consist of: 7 participants (aged 18-30) + 1 group leader (no age limit).

We are looking for participants who are curious, motivated and ready to embrace the spirit of stepping out of their comfort zone.

Youth should be interested in technology and social change, and ready to actively contribute to all activities.

No prior AI expertise is required, just a willingness to learn and grow!

In total: **32** participants.
