WHAT IS creAltion?

creAltion is an 8-day Erasmus+ Youth Exchange that brings together 28 young people aged 18–30 from Poland, Spain, Greece and Lithuania.

The project explores the connection between artificial intelligence and art. Through workshops, discussions and intercultural learning, participants will discover how AI can be used as a creative tool for generating digital art, animations, music and other artistic content.

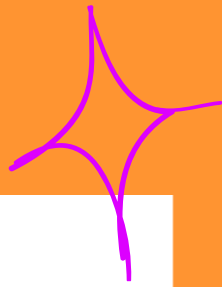

The main goal of the project is to increase young people's knowledge of AI, develop their creativity and critical thinking skills and encourage reflection on the role of artificial intelligence in contemporary art and society.

During the exchange, participants will work in international teams, learn how to use various AI tools, create their own digital artworks, and contribute to a collective interactive AI Art Gallery that will be available online after the project.

At the same time, the project promotes intercultural dialogue, teamwork, active participation and the exchange of ideas between young people from different European countries.
